

Costing Techniques

LOC Cost Table

We want to estimate the cost for a project to develop a CAD (computer-aided design) system. The LOC Cost Table is developed:

Function	Optimistic a	Most m	Pessimistic b	Expected Le	Deviation Ld	\$/Line	Line/Month	Cost	Months
Interface	1800	2400	2650	2340	140				
2-D geometanalysis	tric 4100	5200	7400	5380	550				
3-D geometanalysis	tric 4600	6900	8600	6800	670
